Score by innings.

The Old Colony railroad continues to drive their work of exercising on East street.

During the rest week the residents of the Friday morning, July 4, the Actives will visit Borchester and play the Cayennes of lill have been greatly inconvenienced by that place, Saturday, July 5, they will play the Weymouth Centre chile at Sor Weymouth.

members of the choir and their husbands A man who was in the field having with and wives, making a company of 26, met at her home on Tuesday evening. A very Pediceman Allen Tuesday, on Pend Plain. had a sunstroke, and was entirely pros-trated. It was a very hot day for men, but pleasant hour was spent in sluging upon the lawn after which ice cream and cake excelleft for making hay. There will be no special Fourth of July

celebrations here but everybody will make the most of the day and show signs of pat riotism in many ways. The boys, of coarse, will make things lively nearly and shunbers will be distarted, but w have all been there and aught not to conplain so long as no sick people are di Humphrey have been in towic on a visit to turbed. It wouldn't be Independence day without more or less racket. ----

Base Ball.

The East Weymouths won a well co ested game of ball last Saturday, ugains he Goodyear Shoe Machine Co. of Boston, by a score of 9 to 5. The Goodyears batted pard, but good fielding by the East Weymouths kept the score down. The feating of the game were the catching of Farrar and the fielding of Fennell and H. Martin the Sunday Sensor by 511s. Terreit should have read in behalf of the Rose Bud Band, the latter making two remarkable catches. Thursday, while mowing a piece of grass Barr, for the visitors, pitched at splendid pecially that of "Ave Maria" by select voices, with chorus in the distance by the school. When number 26 on the prosgramme was reached, Mr doseph A. Cushong, of the school board, stepped on the distance with the distance of them, but willing help and strong pulls in the findly rescued them.

GEORGE E. STURTEVANT,

High School Gradustions.

The interest and pride which the people of Weymouth feel in their school system was manifested by the large and attentive andience that gathernal in the Baptist church last Friday evening to witness the closing exercises of the class of 30 of the North High School.

Diver the choir gallery was suspended in gracefully formed letters, the motion "Simerity" with the dates 1886—1800, and tastefully arranged masses of cut flowers ornameuted the front of the platform.

At 8 O'ylock, the pupils of the school matched up the main aisle headed by the chief asher, Mr. Heorge Tracy, and uponting their ranks allowed the graduates to puss between the lines and take their places on the platform where their bright faces and pretty dresses presented a most attractive appearance.

BY CLARA M. WHITING.

Friends and classmarks, we must sever
Many ties that himlus fast,
Though we long delay the parting,
We must say "Farewell" at last,
From our teachers, kind and friendly,
We must part with many a sigh;
To each other, slowly, sadly,
We must say a found "timod-lyo,"
We must have the dear obt school-linuse,
So faudding to our sight,
Our happy years of school-life
We must have behind to-aight.
But moil the cares and duties We must heave behind to-night.
But maid the cares and duries.
Which our daily lives must throng.
We'll remember one another.
Though the parting may be long.
Though our school-days may be embed.
Life's great work is just begun,
there are noble partis to follow.
There are widerlies to be won,
act us his one bat.

We may compler, one and all. The graduating exercises of the South laursday evening, and the profilency and alture as well as deep and interesting bought shown by the graduating class was

LADIES DEPARTMENT.

BUTE IS AGAIN FASILIONABLE. Blue is more fashlonable than it has been for iwenty years. Peacock tints are not popular, but turquoise, navy sky and the uld blue shades are very popular just now. The navy is selected for yachting, field sports and travelling dresses, and the little blazer is frequently lined with facings of white. Another fancy is the bine enshmere or serge walking dress girdled with a gold hell.- [New World.

BAINBOW BORES. The most striking thing about the new summer gowns are the sleeves. They are of different unterial from the costume; sometimes silk, last oftener veivet or brocade. Some are of silk wrought so closely with thisel that they gleam and sparkla like jewels in the sun, with every movement of the wenrer. So great is the demand for unique siceves, that modistes are sellhig them in every variety of material, made up, ready to be sewn lide the bodice. - [New York Journal.

Saracen brides were the first to wear orange blossoms, and occasionally the same emblem has been worn by European brides ever since the time of the first deer. A punther is a great big Trusades; but the general adoption of others to look over the timber and iron ent, and when one is interfered with it wreaths of orange blossoms for hides is apt to make things tively unless it is comparatively a modern practice. dun especially to the recent taste for flower language. The subject of bridal decorations being made a study. the ancient Saraceus, It was introduced by modistes as a fit ornament for brides. The notion once idented soon became a custom now very general, adopted by all brides who study the conventions of society and follow the accepted fushious.

The talse jewels which are now used for trimming dresses are being buitated by real stones, says Miss he moved in with his wife and two and caught sight of the panther just. The tables are turned for once, and the real follows the sham. Thus ladies who have diamonds and rulies and ments and choosing her acquaintances.

DIMONIS VERSUS FLOWERS. The spirited way in which the ladies fashionable Paris gave a lesson the other day to a fair stranger from the far south will really do credit to the celebrated femmes d'esprit of the first monds. At the next dance the Parisian ladies, unwilling to be outshone, had decked themselves out in all their South American buly. At the fourth ger threatent. party the latter came in once again.

ression. He said that was one of the shots Travis had taught bim, and he the education that pervades all classes. It is practice. The mother of the education that pervades all classes. It is practiced to the education that pervades all classes. It is practiced to the education that pervades all classes.

A STRUGGLE WITH DIRT Goes on in civilized society from the cradlo to the grave. Dirt is degra-Goes on in civilized society from the cradio to the grave. Dirt is degradation—and degradation is destruction. Women, especially, are judged by their habits of household cleanliness, and no stronger condemnation can be expressed than "she keeps a dirty house and a filthy kitchen." But the struggle with dirt is often unequal. The woman's weakness or the worthlessness of the scaps she uses make it impossible to overcome the demon of dirt. By the use of SAPOLIO she wins easily.

A Patagoaian Child Doctor.

When a child lo Patagonia is sick, a messenger is despatched for the doctor, ing and been sleeping where he could, and never leaves him until he comes the few pence he contrived to earn with him. As soon as the doctor arpity, and yet the few facts Archy drew from him were an aqueal to any one conversant with the city. He lived a rives, he looks at the sick child, and conversant with the city. He lived a work, till he fancied that the officials mile nway, 24 Hilk street, an address at different establishments were look- of the skin, and so rendering still more weigh four pounds, and should then that lingered cariously in Archy's ing on him with suspection, as one memory. He had been a carpenter, whom they had refused before. And Yellow clay is brought and made into hopelessly out of work, and, with his back to his old place. Warner would child is painted from head to foot, wife and their young child, had been give it up without a murmur, or a causing him to cry again. "The devil grange; he was that kind of fellow. Is still there," says the doelor sagely, bees, while a tarm laborer in her emwing how be could.

Gridge; he was that kind of fellow. Is still there," says the doelor sagely, and nudoes two mysterious packages he ploy cannot go near the lives without carries, one contains rhea sinews (oslrich) and the other a rattle made of stones in a gourd decorated with

feathers. He then thurers the shows, mattering something for a few minutes, then tack by them, when other perhe seizes the rattle and shakes it viothat the next morning, as his eyes. They had a quarter of an hour to wait, lently, staring very hard at the crying lilves without exciting their animosity figure, again, a sadden impulse selzed his favorite public house, which was and it ceases crying. Again it is dertake to keep bees would be not only conveniently situated. Warner looked painted, raitied at and stared ut, and unideasant but unprofitable. Their suid, accosting Warner; "I'm awfully expecting some one, but it was almost anxious to have the day, but 1 can't described. There was a policeman a considered described by the fear many persons becomes the state of the described by the fear many persons the state of the described by the fear many persons the state of the described by the fear many persons the state of the described by the fear many persons the state of the described by the fear many persons the state of the described by the fear many persons the state of the described by the fear many persons the state of the described by the fear many persons the state of the described by the fear many persons the state of the described by the fear many persons the state of the described by the fear many persons the state of the described by the fear many persons the state of the desc goes his way, having received two bees and dodging them, when if they to say, the child generally recovers, Warner's face fell, but it lightened hat it it does not, the doctor gets out "It's just here," said Archy, staring again in a moment, as a girlish figure of the difficulty by declaring that the going down into the country for a day and run lightly across to the country skin tightly around the child, and so bacco and liquor never make success-- [Ladies' Home Journal.

State at present than there were twelve months ago. The total membership of the State being 51,199.

The officers of Crescent Lodge were publicly in-

The New Age comments upon the fact that it is

becoming a frequent occurrence for marriages to take place in Rebekah degree lodges and aids; "Why no?" Whete can parents find better husbands for their daughters than among young men

who have passed investigating committees in subor-dinate lodges; and where can young men find bet-ter wives than the daughters of those whose lives are

founded upon the principles of Odd Fellowship?

Crescent Lodge will work the third degree upon two candidates next Thursday evening. Charles D. Cole of the Jurisdiction of Massachu-

D. D. S. Gov., Joseph Chase Jr., installed the ollowing officers of Monatiquot Colony last Tues-

ORDER OF AEGIS.

Tickets for the benefit of Charles Branch ar-

Speech of Congressman Morse on the Silver Bill, in the National Mosse of Representatives June 23, 1850.

The Speaker: The gentleman front Massachuselts [Mr. Morse] is recognized for fifteen minutes. Mr. Morse: Mr. Speaker, but for the fact that am myself a business man and represent on this fifter a district having large and Important business interests, it would remain silent and simply record my vote, as I believe, in the interests of my constituents, and in the interest of the country.

I do not propose any rights of oratory or rhetoric, such as we have witnessed on the other side, but I propose to make a simple, unwarnished statement of the fact with reference to the currency question, as I understand it.

What is the present situation of the finances of

country.

I regard the Senate bill as closely allied to the flat money and greenback delusion that swept over the country a few years ago.

The genlleman from Missourl [Mr. Bland] told use yearstay that legislation by Congress would nake 412 grains in alloyed silver, or 37½ grains of pine silver a dollar.

If his premises are correct and we can make that amount of silver a dollar by legislation of this country alone, why not go farther and legislate that half as much silver, 206 grains will make a dollar? 1 regard that proposition as arrant nonseense.

Mr. Synnola: Let us have order, Mr. Speaker, 1 want to lear the gentleman from Massachusetts. The Speaker. The Honse will be in order.

Mr. Morse: I will try to speak so that the gentleman from New Verk can hear me.

The Moritson tariff bill, which proposed a hnrizontal reduction in duities of 20 per cent, was denounced in the North as a free-drade measure, and yet here is a bill that proposes to make all duities, payable in a 72 cent dollar and proposes a horizonal reduction of 32 per cent in all duities, and would neutralize largely the proposed protective duities of the McKinley tariff bill.

Suppose such a dishonest measure as this Senate bill solud pass this House. Who are going to the McKinley tariff bill.

Suppose such a dishonest measure as this Senate bill solud pass this House. Who are going to the McKinley tariff bill.

Suppose such a dishonest measure as this Senate bill solud pass this House. Who are going to the McKinley tariff bill.

Suppose such a dishonest measure as this Senate bill solud pass this House. Who are going to the McKinley tariff bill.

Suppose such a dishonest measure as this Senate bill solud pass this House. Who are going to the McKinley tariff bill.

Suppose such a dishonest measure as this Senate bill solud pass this House. Who are going to the distribution of the currency. Why? Because wages are the tathing to advance, and such an inillation of the currency why? Because wages are the stilling to advance, and such an inillation prosperous condition tinancially and numerically than at the present time. The report of the

currency. Why? Because wages are the last thing to advance, and such an inflation of the currency would immediately result in an advance in everything that the laboring people and wagework ers eat, wear and luny.

We should have to pay for imported goods in gold or its equivalent, which would mean large advance in the prices of tea, coffee, sugar, silk, and a thousand necessities as well as liconities.

This inflation measure passed by the Senate would unsettle values and inflict great and lasting injury to the finances and business interests of the country it might take years to recover from.

No, Mr. Speaker, the rich will not be the principal solferers by this bill. The trust final or the latter all of widows and orphans deposited in the strings banks of the country would be payable in this depreciated corrency and would shrink 25 per certain value the day the bill was signed by the president, if such a thing were possible.

No, Mr. Speaker, the class that would be principally benefitted by this bill. Would be the silver mine and hullion owners who, if reports can be believed, have been guilty in these halls of "ways that are dark and tricks that are vain," who have crowded the corridors of this capitol, if reports are true, since this Congress convened, with the most formulable and "inscrupulous" "lobby" that the capitol ever saw,

Have the gentlemen who advocate the Senate hall sead the substitute of the s

passing through the most gigantic war of modern times, a war that incurred a national debt of such gigantic proportions that the world was appalled by its magnitude? Have they read that when peace came and the army of citizen soldiers melted away, and a million of men returned to peaceful pursuits, have they read that the new who tought the war to a successful issue and continued its a nation among the nations of the earth were the first to insist that the national credit should be maintained, were the first to insist that the men who loaned their money to the government in the hour of its decally peril and when its credit was poor should be paid "as nominated in the bond," in the money of the world, based upon gold and silver coin?

Have they read that later the country ruse like a great giant and resumed specie payment, in spite of the opposition of the Democratic party, and thus command the respect and admiration of every civilized country on the face of the earth.

Now, at this late day, shall we come down from the high financial position which we enjoy among the nations of the earth and Mexicanize our finances, and return to a debased currency, by an unlimited coinage of silver into 72-cent dollars, and insuit the Almighty by stamping on them, "to God we trust?"

Mr. Cutcheon. I would like to ask the gentlethe second year. New York, Pennsylvania, Ohio, Michigan, Illinois Indiana and Missonri, and reports the prospect very flattering for a large increase of membership KNIGHTS OF HONOR.

meeting with a ready sale, and the indications are hat a goodly sum will be realized for this willing Last Wednesday evening, D. D. S. D., E. Q. S. trust? "

Mr. Cutcheon. I would like to ask the gentle-man from Massachusette in whom else we can trust for the balance if the dollar is only worth 72 cents? Mr. Morse. Well, let us be honest, and stamp this tollar what it is worth, 72 cents, and trust in tod for the other 28 cents. We may deceive me in regard to its value, but certainly we cannot de-Litchfield and suite of Pilgrim Lodge installed th of Royal Arganum. The Supreme secretary is about to issue a new lotar, No 88, for the use of the secretary of each subordinate council; it will prove to be in great asistance to enable the secretary to keep a correct ecord of the financial and innuerical business of he council, and will also serve to lesson the Libor of the officers in making up their annual reports.
TEMPLE OF HONOR. The Junior Templars have set apart the second

tool for the other as cents. We may deceive men in regard to its value, bit certainly we cannot deceive the Almighty.

The House Hill, which, I trust we shall insist upon, though increasing the coinage to meet the growing demans-so the country, would still manutain gold and silver at par, in consequence of the bulloon with the secretary of the treasury to redeen the silver certificates in a gold dollar's worth of silver bullion, and to buy and pay for the bullion by the same standard.

This demand for a cheap, 72-cent dollar, like the llat money deliuson, was burn in iniquity and conceived in sin. It is an attempt on the part of the debt, or class to repudiate 28 per cent of its just debts, and ishould be refused, because it violates the command, "Thou shalt not steal."

To define the cave of Macphela to bury Sarah in, and I believe that gold and silver law bury sarah in, and I believe that gold and silver should both be the money of the country, but I repeat that there, should be a hundred cents' worth of silver behind this silver dollar, or silver certificate. Anything else is dishonest.

The yote which this bill received in the Senate is entirely miskealing as indicating the sentiment of the country. Monday night in every month for work in the de-GOLDEN CROSS. The following are the officers elected of Orion himmandery, South Weymouth, who will be in-. Cook, who has been appointed in place of Rev. W. H. Bolster, who is in Enrope: N. C., William H. Robinson (N. V. C., Mary A. Crawford . W. P., Mary G. Pitcher; K. of P. II., Adson II. Belcher: W. I. Ci., Horace W entirely misleading as indicating the sentiment of the country.

Wise or otherwise, our fathers ordained that every State, large or small, should be represented by two senators, and the states just admitted, which have only one representative on this floor, and the silver owining and producing states have each two senators and tree same representation in the Senate as the great states of New York, Pennsylvania, Ohio, and Massachusetts; and I claim that this flowe of Representatives is a far better representative of the sentiment of the people upon this question then the Senate, for the reason I have stated, and I trost we shall reject all dishonest, fraudielint, and 'tost' teatures of the silver lift to be passed.

I am hully personaled that if such a silver bill as the Senate incasure were submitted to a popular vote of the people it would be voted down by an overwhelming majority.

During this debate I have heard from genticioner on the other side densive works spoken or the base.

What a world it is! Almost all of us bent on our own affairs. It pays, though, to look beyond self.

A maker of lamp chimneys thinks of nothing but selling his chinneys. What will do that? Low price. Very well; he makes them as mean as he an, and puts his price down. It's no concern of his if they Manager Kendrick, of the O. C. H. R., wil break at first flame's touch.

Another maker makes his chimneys as good as he can, and "pearl-tops" them. They will not break in use, he says. There is one such maker:

overwhemming majoraly.

During this debate I have heard from gentlement on the other side deristic words spoken at the business men, manufacturers, bankers, and capitalists of New England and Massachusetts. They have been derided in these halls as "bloated bondholders," "gold bugs," "shylocks," etc.

Neither New England nor Massachusetts need any eulogium or detense at my hands. I say to all the traducers of Massachusetts as Ansoit Burling game once said on this floor many years ago, "I mrow down their gloves to the whole band of her assalants;" or as that other great sint, Daniel Webster said, "There she stands, behold her." E minute from the West and South, the capital and enterprise of these same men, and I tell you the unboken praine and the princeal lorest of creation would stand on place of some of your entes and propulous fowns. Who builds the Western rathroad that develop that great and growing section of the country? Who joined the Atlantic and Pacific occans with a rathroad? Who builds the bity buildings whose similarts piece the sky, in you Western cities? Macbeth & Co., Pittsburgh.

Mr. Herbert, F. Dable, of West Quit has sold his trotter "Sear Jack" in Mr. El-bridge Porter, of Briditlee. This is the horse that trotted a mile In 2.49 4-2 at South Weymouth track Memorial day, and is capable of doing it a number of second fuster our ir good trank.

C. B. BATES' COMBINATION HEATER.

G. B. BATES,

Dear Sta:

In reply to your inquiry of the 6th, will say, I an glad to inform you that the No. 332 Hot Water and Hot Air Heater which has been in use all winter, is operating excellently. It does all and more than was claimed for it. It is very teilable in its action, being quick or slow, as may be required. Yo say that I have been satisfied with its working from first to last, is expressing my high opinion of ta ments in very mild terms, for I am careest in every word of praws I say of it. I unhesitatingly recommend it to any one who may require a heating apparatus, as it is a decided success, being very powerful, and economical. The fire is easily maniged, and the heat is soft and pleasant. I have onsoured one into it coal per month, including my cooking range and the heater, so one can judge how consolical it is, soot have had my house thoroughly sagmited. I would be pleased to have any one that sinterested, in hot water heating come to my house and see it for themselves.

Respectibility yours, WALLACE II. BICKNELL. G. B. BATES. Year Jenkina' Factory, East Begintres, Jur. Hancock & Washington Sta., Quincy

In Glad Weather.

I do not know what alies there were
Nor if the wind was high or low;
I think I heard the branches stir.
A little, when we turned to no!

I think I naw the grance nway
As if they tried to kim your flot—
And yet, it seems like yesterday, That day together, sweet! I think it must have been in May;
I think it must have been in May;
I think the senlight must have show
I knew a seent of springtime by
Aeroes the fields; we were alone.
We went tegether, you and I;
More could I leaft beyond your eyes?
If you were only standing by
I did not mise the shies!

I could not tell if evening glowed, Or socaday heet lay white and still Beyond the shadows of the rood; I only watched your face, until I hnew it was the gladdest day, The sweetest day that summer knew-the time when we two stole sway

wholesale house of Zimmerman & Co., and being about the same age, and formerly schoolmntes, were very intinate, both in and out of their busiless associations.

Marshall lived with his parents, and rankiin was an orphau, but hoth vere boys of excellent character, and erved their employers faithfully; yet,

HOSPITAL DEPARTMENT. In charge of Maj. Oils H. Marlon, Sargeo First Regintent Infantry, M. V. M. There will be an emergency hospital illy equipped with one hundred beds, ope day and night during the cucampanent, for the exclusive use of G. A. It. Veteraus. There will be in requisition two other hos-idius with ample arrives for any emer-gency, together with ten ambulances. A large corps of physicians have volunteered their services in curling for the sick and injurnel during the encompanent. On the day of the parade there will be established along the line of march, numerous encoency stations, designated by the Red cross tiggs, in direct communication by elephane with the various hospitals and anthumer stations. At each station there will be a member of the Ambulance Corps FASHIONABLE & STYLISH GARMENTS,

and a padheman, equipped with a stretcher similages, splints, water and restoratives bandages, splints, water and restoratives, to meet the needs of any one sick or injured, till an ambulance arrives. On every official excursion going out of Boston during the week, there will be in attendamenary-good and the substantial excursion of the Ambulance Corps. All hairs and hotels where G. A. R. Veteraus are quartered will be requested by telephone with the various hospitals, so that a physician ar ambulance can be called at any tince.

The veteran Army Surgeom are invited to visit the various hospitals, during the week. There will also be a reception for them by the physicians and surgeous of luston.

Histon,
There will be published every marning on the various bulletins, and in the various papers, a list of the sick or injured, if there be any.

What a world it is I Almost all of us bent on our own

affairs. It pays, though, to look beyond self. A maker of lamp chimneys thinks of nothing but selling his chimneys, What will do that? Low price. Very well; he makes them as niean as he can, and puts his price down. It's no concern of his if they

break at first flame's touch, Another maker makes his chinineys as good as he ean, and "pearl-tops" them.
They will not break in use, he says.

There is one such maker:

Macbeth & Co., Pittsburgh.

The stride which English girle are said to have, but which actually obtains only among those who are reared in the pastures, is not gracefai, because il is not womanly. It is no more graceful for a woman to walk like n man than it is for her to be mannish In other particulars. If an American girl were to make a practice of swinging her arms or of carrying her hands upon her sides, when she walked she would at once and properly become an shject of suspicion. -[Chicago News.

OLD-PASHIONED JACAETS. The oddest of designs are seen now in jackets in London and Paris. A jacket of smooth gray cloth had a Richard III. enff and a silk cross-over laside, forming a walstoot. The ends of the silk hang below the jacket on each side. A cape of tan-colored cloth had this scarf-waistcoat arrangement applied to it. The cape had a high collar, and was prettily trimmed with gold embroidery. There is no doubt that as many capes will be worn as jackets. They are made in great profusion in all sorts of attractive materials. One of malberry cloth had a deep turned-down collar in biottingpaper pink. The cape was lined with short siik and fasiened in front with two cloth straps. Of course this comhination of color was only for wear ou smart oceasions .- [New York Star.

THE EMPRESS' KINDNESS TO CHILINDEN. The German Empress Frederick loves little children She never faile to notice every one she seco, and with often step in her walks and speak to them. Even grubhinese will not deter her from taking a particularty fine baby in her arms, though, of course, she prefers them clean. In return, children, who alwaya know their friends by instinct, are attracted to the empresa, and the following little incldent, which occurred lately, lilustrates

A gentleman who passed daily between 3 and 4 o'clock along the road that leads from Berlin to Charlottenburg noticed a little girt always standing at the corner of the Hardenburg Strasse, and at last he asked her why she dld it. "Because of the Empress Frederick," she answered. While the Empress was in Berlin she drove every day when it was fine toward Charlottenburg with her daughters, and at the llippodrome they got out of the carriages ami walked. Her Majesty noticed the little girl always waiting at the same piace, and inveriably nodded kindly in acknowledgement of her curlsy, wherenpon the child went home beamlag .- [Chicago l'est.

Superbly situated at the point where the two streams divide, the Arles of today troubles itself very little about either its ancient glories or its possiblittles of modern improvement. Cures Backache. Backache. Backache. other remodles hi

An article by C. N. Speenew is Applied Electricity tells how an electric current has been used to hasten the germination of seeds and increase the yield of crops. Two sets of experiments are described. In the first, plates of gine and copper were harled in the soil and connected with wires. The report says: "The infance of the current was manifested by a larger crop and by the growth of vegetables of enormous dimensions." In the other, atmospheric electricity was collected by means of numerons insulating rode, connected by wires so that electricity in large quantitles was collected above the seeds.

The experiment was continued for five years and showed an advantage for the electrified tracts ore others was from I1 to more than too per cent. How this compared with the cost of the electricat apparatus does not appear. This cost is said to have been considerable, but an the other hand the apparatus, once set up, will last several years.—[Hartford (Conn.) Courant.

complete the Panama Canal by the year 1910, estimates the New York Sun. Hefore the year 1900 the cuts alrealy wrought upon that isthams will not have left so much as a seas. Festions of vince, well-grown trees, a matted innele flocks of noisy parakeets and troops of monkeys will be the visible scene where France's millions have vanished as one o its own exhabitions.

The Mail and Egress thinks that "Uncle Sam's new plan of allowing the soldiers of the regular ormy to buy their discharge if they get dissolished, and elso of allowing them to quit the ranks lessening desertions. The new provision that \$1 per month shall be dedueted from the soldier's pay for the first year, and held as security ugainst his desertion, would seem to be a strong selditional safeguard against bis taking French leave of the colors."

The Musical World aanounces the inreation of three new and appalling instruments. The first is a bass tildle fourteen and one half feet high and eight and one-half wide, "The performer takes his stand and set of steps, and tkips up and down as the passages to be played may require." Secondly, we have a steam trombone, "which can be distinctly beard at a distance of four miles." Thirdly, an Italian has devised what he calls a "Nasi-flauto," which the performer plays with bly nose, his mouth being thus' left free to smoke, sing, eat

The Bank of Eughand's doors are now to firmly balanced that the clerk, by pressing a knob under bis desk, con close the outer doors instantly, and they cannot be opened again except by special process. This is done to prevent the daring and ingenious naimployed of the great metropolis from robbing this famous institution. The ballion deportments of this and other great English banking establishments are alghtly submerged in several feet of water by the action of unchinery. In some of the Lomlon banks the bullion departments are conneeted with the manager's sleeping rooms, and an entrance cannot be effected without setting off an alarm near cial, during either day or night, should take even as much as one from a pile of a thousand soccreigns, the whole pile would instantly sink and and a pool of water takes its place, beside letting every person in the establishment know of the

The correspondent of the London Telegraph supplies the latest pea picture of Bismarck: "Let me try to describe about it. After keeping sullent; aloof the outward seeming of my illustrious host, as he strole firmly along through as sound in 'wind and timb' as the tough est of his foresters or the burdiest of his ry, Durston was a tonished to readize keepers. He wore a soft, broad-brimmed that he was lying in beil with a pistoi hat, a thick ujde neckerchief knotted in | in his hand, a honor-breaker in the up to the throat, gray transers and strong. double-soled boots. In his right land, blue appear according according according according to the sample according to teo years ago has entirely vanished." sleraly.

That Walk Through the Wheat. Together we walked in the evening time, Above to the sky spread golden clear, and he beat his itend and looked in my eye:

Came Back to Life. In an article on the New York Morgne, the World of that city says: A good stay is told of a laborer name Carroll. He was carrying on bil shoubier not long ago a coffin contain ing the body of a man that had bee an humate of Hellevue Hospital. she before the Morgue was reached the supposed dead than bru bed away the shrond from his face and asked by a faint voice where he was being

taken.
Carroll, astonished, but not at a alarmed, placed the cellis on the ground and looked at the man.
"Where do you suppose?" he replied.
"To the Morgne, of course."
"Int. I am not dead," gasped the

lamate of the coffic.

"Now, see here," interrupted Car-roll, "do you know better than the

floctor? He says you are."

In spite of the man's protestallor Carroll picked up the coffin and earrle it to the Morgue and left it there. The supposed dead to at alarmed some of the hospital clerks by walking into the office shortly afterwards. What hap pened to him subsequently is no known. It is a tradition of the hospi-

The Warld's Population The world's Population.

There are ubout 1,500,000,000 Inhabitants on the globe. Of these 33,013,013 like every year. There are 3,064 languages, and over one thousand religious professed by the people. The munier of mates and females habout thirty-three years; one-fourth of the Inhabitants die before they reach their fifteenth year. To 1000 persons only one reaches the age of 100 years; to every 100 only six ro.ch the age of 65, and not more than one in 500 lives to see the eightieth year; 33,033,033 to see the eightieth year: 33,033,03 dylog every year makes a grand total of 91,821 per day, 3730 per hour, sixty n minute, or one every time the clo

Mariled persons live junger that single ones, and the full have a better chance for lung life than those of short stature. Women have more chances of life in their favor previous to 50 years of age than men have, but fewer afterward.

The number of marriages is in proportion of 75 to every 1,000 individuals born; the line when the greatest number of marriages takes place is in fewer afterward.

June and December-about the tim of the summer and the winter solstices.

Dark-haired persons have a better chance in the greaf struggle for exist-ence than those of the opposite com-plexion, except in contagions diseases, where blondes are comparatively ex-empt. A person born in hof weather stands the heat a great deal better than one born in the cald months of winter of course, the rule works vice versa Those born in the spring are usually of a more robust constitution than if born at any other time of the year. Among the nameless heroes, none are more worthy of martyrdom than ha who rode down the valley of the Comemanys, warning the people ahead of the Johnstown food. Mounted on a powerful hors, faster and faster went the rider, but the flood was awliftly galaing, unfil it caught the unlucky horsenaa and swept on, grinding, crushing, annihilating both weak and strong.

In the same way is disease lurking near, like unto the sword of Damocles, ready to fall, without warning, on its victim, who allows his system to become clogged up, and his blood poisoned, and thereby his health endangered. To eradicate these poisons from the system, no matter what their name or nature, and save yourself a spell of malarial, typhoid or billous fever, or eruptions, awellings, timors and kindren healthy and vigorous, by the use of Dr. Pierce's Golden Meitenl Discovery. It's the only plood-parifice sold on trial. Your money is returned if it doesn't do exactly as recommended. A concentrated vegetable extract. Sold by druggists, in large bottles, at \$1.00.
